PROJECT NAME: Smart water foundation

PROBLEM STATEMENT :

Smart water was created to provide a cross- cutting and multidisciplinary vision of the water problem, mainly oriented towards the construction developments and projects

SOLUTION:

- 1.The initiative focuses on strategic development areas mainly in emerging countries
- 2.its development incorporates regulatory bodies, architects, designers, developers, among others which under structured idea, provide a different perspective ways to collaborate.
- 3.Good water management helps to manage the tourist destination and the infrastructures that makes it up the hotels.

Smart water Foundation uses

Smart water systems allow the collection, treatment, distribution and recycling of water. These systems, often deployed underground, can leak, freeze, or breakdown. These systems are widely deployed on infrastructures nowadays.
